Chapter 1: Automated Lead Pipelines with n8n

Connect inbound webhook triggers from Meta Ads, LinkedIn forms, or Webflow landing pages to an AI enrichment node.

The LLM automatically qualifies the lead based on company revenue, job title, and urgency score before syncing with CRM.

This eliminates manual qualification delays and achieves sub-60-second lead follow-up response times.

Chapter 2: Performance Analytics & Weekly Reporting

Automate your weekly marketing dashboard generation using multi-modal AI agents.

Ingest raw CSV logs from Google Analytics and ad platforms, then generate executive takeaway bullet points.

Join the monthly operator community teardowns to receive new monthly prompt expansions.
